

## **Our C725 PUR**

Summer is coming bringing along a huge flow of concerts and music events.

In this scenery tasker decides to put the attention on one of the most sold and appreciated audio article from rental and service companies, the tasker C725 PUR.

It is an Ethernet digital audio cable, with braided shielding, double sheath and it is also very flexible, despite its polyurethane sheath.

Polyurethane, is a very particular material, both halogen Free and flame retardant, resistant to strength, abrasion, trampling and UV rays; it has an operative temperature range which goes from -40 to + 80 ° C.

For all the mentioned reasons this material is still the best alternative for OUTDOOR installation.

All our cables are customizable with different kind of sheaths, including steel armored advised for outdoor or underground installations even in presence of rodents.
