

Tasker RF 50 ohm Cables

Tasker has a large disposal of radiofrequency cables, starting from the small MIL. Standard silver plated cables RG178 BU with thin diameter (only 1,80 mm) to the most sold RG58 CU.

For best result choose Low Loss !

Tasker new series of Low Loss Wi-Fi cable have a double shielding, capable to ensure the highest performances. The series is composed of 6 different cables, from the smallest C525 with a diameter of 5,00 mm, through the bigger tasker C529 with 10,30 mm, ending with a brand new cable, with extra flex stranded formation and made up entirely in red copper.

Our radiofrequency cables are also part of tasker komby lines like TSK1072, which gathers a RG58 CU MIL Standard with 2 control lines and 2 power conductors.

All the cables described above are customizable with L.S.Z.H. polymer, polyethylene or polyurethane (PUR) sheath, with or without steel armor for underground installation also in presence of rodents.

Tasker strives daily to research and develop new products and materials, creating also custom productions, allowing you to have a specific solution for every single customer and anticipating upcoming technologies, providing new products to meet the needs of today and tomorrow.
