

TASKER C725 PUR

Summer is coming bringing along a huge flow of concerts and music events.

In this scenery tasker decides to put the attention on one of the most sold and appreciated audio article from rental and service companies, the tasker C725 PUR.

It is an Ethernet digital audio cable braided shielded, double sheathed and very flexible, despite its polyurethane sheath.

Polyurethane, is a very particular material, both halogen Free and flame retardant, resistant to strength, abrasion, trampling and UV rays; it has an operative temperature range which goes from -40 to + 80 ° C. For all the mentioned reasons is still the best alternative for OUTDOOR installation.

All our cables are customizable with different kind of sheaths, included steel armored advised for outdoor or underground installation even in presence of rodents.

Tasker technical department continues market researches and updates allow us to be always up with times and to constantly propose new interesting articles able to meet today and tomorrow's needs.
