

NEW Snake and Ibrid Optical Komby Cables

Tasker presents a new line of premade cables, realized joining the new technologies with the classical copper cables.

With a single cable you can carry several signals while maintaining an excellent flexibility for an easier installation.

The first set is composed by a cable containing four LAN cables Cat.6A, tasker C738 L.S.Z.H., and by tasker C739 L.S.Z.H. that contain four coaxial video HD SDI, both made with L.S.Z.H. sheaths, flame retardant and Halogen free.

The second set has two models with integrated optical fibers, tasker C740 and C741 PUR respectively designed for the integrated data transfer with power and to connect professional cameras according to the SMPTE 311M standard.

You can use these brand new cables for indoor or outdoor applications, fixed or mobile laying and also within ducts, conduits, panels and false ceilings.

They are suitable for broadcast and LAN installations too, TV and recording studios, theaters, public buildings, sports and music events.

The whole range is also available with PVC jacket, L.S.Z.H., PE, PUR, with or without metal armoring for underground installation, even in presence of rodents.

Tasker strives daily to research and develop new products and materials, creating also custom productions, which allow you to have a specific solution for every single customer and to anticipate upcoming technologies, providing new products to meet the needs of today and tomorrow.
