

## More divisible flat cables in Tasker range!

Tasker has enriched its range of divisible flat cables inserting new products with different sections, starting from 0,35 up to 4,00 mm<sup>2</sup>, very soft and flexible, all realized with silicon rubber sheath for special applications.

This is a flame retardant material, without halogen and resistant to oil, water, UV rays, chemical and environmental agents. All these features make it particularly suitable for outdoor use.

Moreover, the temperature range goes from -60 to +180°C and offers the possibility of using these cables in various operative situations.

For this characteristics this products are specifically indicated for medical use.

Tasker strives daily to research and develop new products and materials, creating also custom productions, which allow you to have a specific solution for every single customer and to anticipate upcoming technologies, providing new products to meet the needs of today and tomorrow.
